

Legend

- ① Ferry jetty
- ② Walkway threshold feature
- ③ Information Kiosk
- ④ Bus stop
- ⑤ Boat + trailer parking
- ⑥ Boat ramp (relocated)
- ⑦ Jetty with 'woven' angled feature timber boards
- ⑧ Viewing platform over spring
- ⑨ Slow vehicle access
- ⑩ Existing cafe
- ⑪ Disabled car parking
- ⑫ Toilets
- ⑬ Visitor car parking
- ⑭ Picnic grassed area
- ⑮ Swimming pontoon
- ⑯ Short bush walk
- ⑰ Access to event space & rock wall
- ⑱ Waterfront pathway (timber shown, could be concrete)
- ⑲ Staff parking
- ⑳ Boat washdown area
- ㉑ DOC parking

Design Statement

The serenity of Lake Tarawera's lakefront, nestled in native bush and deep blue green hues of the landscape with the omniscient profile of Mt Tarawera across the water, draws people from across the globe. The landing acts a gateway to the lake, connecting people, water and land.

The raw beauty of the surroundings take prominence in the design. The concept uses materials and forms which create simple, timeless elegance which complement the character of the area. The use of natural materials and simple spaces which mould into the landscape and enhance the functionality of the site. Connections formed through the bold lake front boardwalk, mimic the waters edge, bleeds into the wider landscape, cementing the concept to the place.

The key moves for the concept are:

- Separation of three key areas, with emphasis on multi-use pedestrian areas
- Strong connection to waterfront and expansive vistas by accentuating lake edge
- Realignment of jetty and boat ramp to create pedestrian threshold and draw attention to the lake
